Title Index

Number 1 **Page**

Relative Gain Matrix for Distillation Control—A Rigorous Computational Procedure 3

Boiler Combustion Control with Gas Turbine Exhaust Gas Supplement of Forced Draft Air 13

A New Process Analysis Approach for Acid or Base Concentration: Differential Conductivity-Ion Exchange 23

Use of Luminescent Bacterial System for the Rapid Assesment of Aquatic Toxicity 29

Process Performance Based on Control Strategies 35

Modeling and Control of Geothermal Heating Systems 53

An Information-Oriented Process Interface 59

Time Response of Temperature Sensors 65

In-Flight Fatigue Crack Monitoring Using Acoustic Emission 79

Number 2

Industrial Application of a Self-Tuning Feedback Control Algorithm 3

A New Solution to an Old Flow Measuring Problem 11

Noninvasive Pulsed Doppler Blood Velocity Measurements and Calculated Flow in Human Digital Arteries 15

The Use of Combustible Detectors in Protecting Facilities from Flammable Hazards 25

The Evolution of the Spaceflight Tracking and Data Network 31

Direct Digital Control of the Cooling System for a Continuous Caster 43

The Tracking and Data Relay Satellite 49

Characterized Feedback and Feedforward pH Control 63

Total Oxygen Demand—Recent Advances in the Automatic Oxygen Demand Analysis Technique 67

Cross-Flow Modulation Technique Improves NDIR Sensitivity and Stability 77

Title Index (cont.)

Number 3 **Page**

Variable Gain Dead Time Compensation for the Second-Order Time Lag Case 1
Ultravoilet Ladar for Tracking Explosion Plumes and Ejecta 13
Consolidated Space Operations Center 23
Application of Comparison Theorems to Controller Tuning for Nonlinear Systems 31
A Buried Telemetry System for In-Situ Energy Extraction 43
Lock Detector Algorithms for Synchronization 49
An Automatic Oxygen Trim Control System 57
A New On-Line Density Meter for Viscous Liquids and Slurries 67
An Opto-Electronic Method for Wind Tunnel Model Alighments 77
Turbidimetric Measurement of Strongly Colored Liquids Using a Ratio Turbidimeter 91

Number 4

A Study of Ringing and Dead Time Compensation in Dahlin's Digital Control Algorithm 1
Analysis of Dynamic Stresses and Motion of Pressure Gages in Alluvium 13
The Large Geostationary Platform and the Real World 27
Errors in Derived Kinematic Variables Determined from a Fixed Accelerometer Configuration 35
Instrumentation Needs for Food Process Design 49
Frequency Response and Heat Transfer in a dP Measurement System with Long Sensing Line 61
The Discrete Analytical Predictor—A Generalized Dead Time Compensation Technique 77
A Rugged Calorimeter with a Fast Rise Time 87
An Effective Environmental Control System for a Supersonic Air-Launched Missile 95
